Click-to-Dial

Contact Lookup

Queue Profiling

Journaling

Call Popping

Identify incoming Agile calls

Auto pop Agile contact on answer

Prioritise Agile contacts in queue

The screenshot displays the Unity CRM interface for agent Jenna Wimshurst. It includes a top navigation bar with icons for various functions. Below this is a 'My Statistics' table with columns for Name, Total Calls, Answered Calls, Missed Calls, Total Talk Time, Average Talk Time, Web Chats Received, Chats Answered, and Answered. A table below shows statistics for 'Bolts Sales', 'Kakapo Systems', and 'Nuts Sales'. The main area shows a call log with columns for Activity, From, and To. A context menu is open over a call from 'Natalie Maines (Agile CRM Contact)', with options like 'Answer call', 'Promote call', 'Transfer', 'Show agent activity', 'Reset column widths', and 'Show gridlines'. A search bar is visible with the text 'george'. A contact card for 'Sri' is shown on the right, and a call log on the far right shows 'Incoming Call' and 'Outgoing Call' entries.

Search Agile within Unity

Open Agile contact

Automatic call logging

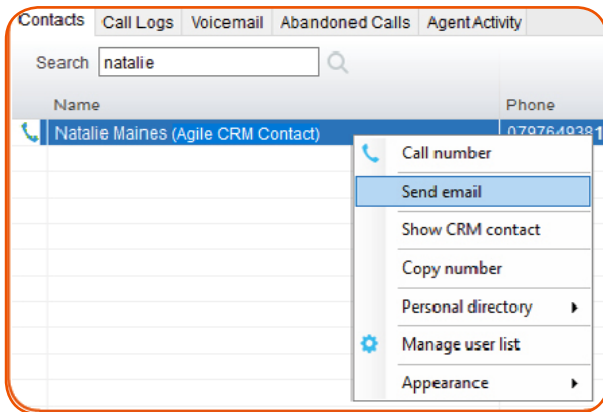

Collate Your Contacts With Unity & Agile CRM
 Unity seamlessly integrates with Agile to facilitate contact lookup and “popping” for inbound and outbound calls, searching for CRM contacts within Unity and click to dial both from within Unity and the CRM platform.

Unity CRM Connect will pop the record in Agile CRM, either automatically or when the user clicks the call notification. Outbound calls can be made from within Agile direct, or through Unity Contact Search.

UNITY – AGILE CRM INTEGRATION

Key Features

Contact Search

Perform a contact search and Unity will not only check all directories such as the group/enterprise phone list, personal directory and Outlook etc, but it will also dynamically search your Agile contacts.

Automatic Call Pop

When a CRM contact is called, the user can easily view the contact in the Agile platform. Unity can also be configured to automatically pop the CRM contact when the call is answered.

Add Call Log Entry

Easily configure Unity to automatically add a call log entry for any calls. Users can then add further notes manually, which will then be stored in Agile.
