

UNITY BRANDING OVERVIEW

Unity can be easily branded allowing you to use your own logo, icon and replace the word Unity all together. Below is a screenshot of Unity that has been completely branded for JW Communications.

All branding is set in the Brandings tab in the portal and will cascade to down all resellers, groups and users within the enterprise.

The logo (200px x 70px PNG) is displayed at the top right of the Unity interface and the Icon (ICO file) is located on the top left and in the taskbar.

Replacement BroadWorks Phrase will replace all mentions of the word BroadWorks with the word that is entered in the box. Similarly, whatever is entered into the Replacement Client Name will replace the word Unity.

Unity's colour scheme can also be changed by choosing from the preset skins in Settings [button] > Settings [tab] > Appearance > Skin.
