

## UNINSTALL UNITY & REMOVE USERS REGISTRY SETTINGS

### Remove the Users Registry Settings

1. Navigate to C:\Program Files (x86)\Unity Client “UnityUninstaller.exe” and use Shift/Right Click and choose “Run as Administrator” (You may already be an administrator and not need to do this).

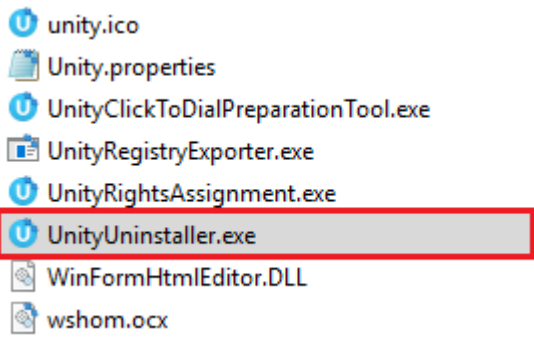

2. You will see the screen below which allows you to remove the user’s Unity registry settings. You have the option to uninstall Unity straight after that.

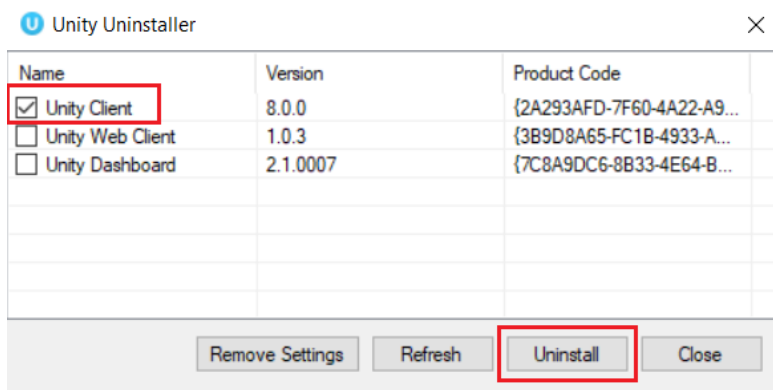

### Uninstall the Unity Application

1. Navigate to C:\Program Files (x86)\Unity Client “UnityUninstaller.exe” and use Shift/Right Click and choose “Run as Administrator” (You may already be an administrator and not need to do this)

2. You will see the screen below which allows you to choose the Unity product you want to uninstall. As an example, if you choose Unity Client and click “Uninstall” this will uninstall that Unity product only.

3. If you are uninstalling Unity you will need to Agree to all the warnings.

4. OK to the below screen to complete the uninstall.
