# 1. THE PORTAL

This document will give you an overview on how to use the Unity Portal and assign licenses as well as explaining how the BroadWorks hierarchy and setup process works.

Did you know that you can also integrate the Portal with your existing provisioning system? Email [ineedhelp@kakaposystems.com](mailto:ineedhelp@kakaposystems.com) for more information.

When you are sent your portal login details go to <https://portal.unityclient.com/> to login, if your login attempts fail three times then the account will be locked. Once an account is locked it can be unlocked by any logged-in user.

Details Automatic Assignment Branding Server Hostnames **Portal User Accounts** License Details Resellers His

### Update arjun.h@dco.in

Add or update a portal user account and assign permissions. When updating, the password will only be updated if one is entered. A user's email address is used to send notification of ticket updates etc and must be verified before the user is granted access to the portal. A portal user account can also be set as an interface user. These accounts cannot log into the web portal but are used when provisioning interface users.

### Notifications

**Unity License Consumption Reminder**  
This notification is to inform you that the below licenses have been consumed. Consumption: 91.43 Current number of trial licenses in use: 9  
Entered by chris.tutt at 2017.01.27 03:00:04

**Unity License Consumption Reminder**  
This notification is to inform you that the below licenses have been consumed. Consumption: 98.91 Current number of trial licenses in use: 36  
Entered by chris.tutt at 2017.01.20 03:00:07

**Unity License Consumption Reminder**  
This notification is to inform you that the below licenses have been consumed. Consumption: 98.82 Current number of trial licenses in use: 29  
Entered by chris.tutt at 2017.01.13 03:00:05

The Portal is separated into sections relating to the BroadWorks hierarchy; System Provider, Reseller, Group and User. This document outlines the different settings available in the different sections and how they cascade down the hierarchy.

Any settings configured at a higher level will cascade down to the lower ones. These settings can be overridden by simply ticking or unticking the relevant boxes at a lower level. E.g. If “Rollback Available” is ticked at the System Provider level then it will be ticked for all Resellers, Groups and Users. However, the Reseller/Group/User can override this by unticking the box in their own Branding tab.

If any text boxes in the portal settings are left blank then whatever is in the text box at the Parent level will be used. E.g. If there is no license expiry prompt set for the Group level then the information will be pulled from the Reseller level.

Please note: After you change any setting in the portal you must go to the bottom of the page and click Update to save the changes. If you do not click Update the changes will not be saved.

## 2. DETAILS TAB

---

In this section the Name, Accounts Reference and Trial duration for the System Provider, Reseller and Group is initially setup.

The screenshot shows a web interface with a tabbed menu at the top containing 'Details', 'Automatic Assignment', 'Branding', 'Server Hostnames', and 'Portal User Accounts'. The 'Details' tab is selected. Below the tabs, the heading 'Details' is followed by the instruction: 'Add a system provider to the system, or update an existing provider. If the trial duration is set as'. The form contains the following fields: 'Name' with the value 'JW Communications', 'Accounts Reference' (empty), 'Trial Duration (In Days)' with a dropdown menu set to '14', and 'Use Trial Licenses Until Expiration' with a checked checkbox. At the bottom are 'Cancel' and 'Update Provider' buttons.

If you are looking at the Details tab for a User this will display the User ID/MAC Address, Computer Name, Phone and External Reference.

The screenshot shows a web interface with a tabbed menu at the top containing 'Details', 'Branding', 'License Details', and 'History Log'. The 'Details' tab is selected. Below the tabs, the heading 'Details' is followed by the instruction: 'Use the tabs to manage this user. The user id **must** match the user id in Broadworks, otherwise'. The form contains the following fields: 'User ID / MAC Address' with the placeholder 'Enter your MAC address here', 'User / Computer Name' with the placeholder 'Enter your Computer Name here', 'Phone' with the value '02082881257', and 'External Reference' (empty). At the bottom are 'Cancel', 'Update User', and 'Delete User' buttons.

### 3. AUTOMATIC ASSIGNMENT TAB

Here the System Provider, Reseller and Group are able to customise the expiry prompt that is presented to users once their license has expired.

It is also possible to customise the message they are presented with if the user or call center login fails.

To automatically assign licenses to users simply select the license type from the drop down menu and once the trial license expires for that application, Unity will automatically assign one to the user.

Automatic assignment can be done at the System provider, Reseller and Group level. However, these are usually done at the Reseller and Group level as any automatic assignments made at the system provider level will cascade down to every user under all Resellers.

### 4. BRANDING TAB

Most of the settings in the Branding tab usually only need to be setup once.

Details Automatic Assignment Branding Server Hostnames Portal User Accounts License Details

### Branding Details

The brand includes information that saves the user entering configuration details into many applications in the Unity i

The below details will configure the Unity application to connect to the VoIP platform and an instant messaging server (keepalive messages should be sent every five minutes (300 seconds).)

The Call Details Available setting specifies whether a user is permitted to view the details of another user's call, inclu

The Enterprise View Available setting allows users to view and monitor other users in the enterprise. If 'No' is selecte this feature.

Unity updates can be controlled by specifying the version that is permitted to be downloaded and applied. This allows Unity will automatically refresh call center statistics based on a random frequency between the values set. This is to

## Branding

In the Branding tab the System Provider/Reseller/Group's logo and Icon can be uploaded. The logo is displayed at the top right of the Unity interface and the Icon is located on the top left and in the taskbar.

Replacement BroadWorks Phrase will replace all mentions of the word BroadWorks to the word that is entered in the box. Similarly, whatever is entered into the Replacement Client Name will replace the word Unity.

|                               |   |
|-------------------------------|---|
| Logo Url                      | <input type="text"/>                                      |
| Icon Path                     | <input type="button" value="Choose file"/> No file chosen |
| Use Icon In Shortcuts         | <input type="checkbox"/>                                  |
| Replacement Broadworks Phrase | <input type="text" value="JW Communications"/>            |
| Replacement Client Name       | <input type="text" value="JW Communications Unity"/>      |

## Customisation

“Support Client URL” is the address you want the user to be taken to when clicking Help>Get remote assistance in Unity. This can be done at any level. The call recording URL will be the Broadworks XSP server/servers that host the XSI interface.

| Customisation                                    |   |
|--|---|
| Support Client URL                               | <input type="text" value="http://www.kakaposystems.com/w"/> |
| Prompt Users To Change Their Startup Application | <input type="checkbox"/>                                    |
| Prompt Users To Use Unity Click To Dial          | <input checked="" type="checkbox"/>                         |
| Call Recording URL                               | <input type="text" value="https://ews.kakaposystems.com"/>  |
| User Can Change Recording Option                 | <input type="text" value="Show button"/>                    |
| DDE Integration Available                        | <input type="checkbox"/>                                    |
| Browse To URL Address                            | <input type="text"/>  |
| Contents Menu is Visible                         | <input checked="" type="checkbox"/>                         |
| End-Users Can Raise Tickets                      | <input type="checkbox"/>                                    |

## Call Center

The “Record Call Center Events” box needs to be ticked in order for Supervisors and Agents to see the abandoned calls in the abandoned calls tab.

| Call Center                                  |  |
|--|--|
| Get Reason Codes URL                         | <input type="text"/>   |
| Set Reason Codes URL                         | <input type="text"/>   |
| Record Call Center Events                    | <input checked="" type="checkbox"/>                                  |
| Report Viewer Is Available                   | <input checked="" type="checkbox"/>                                  |
| User Can Choose To See Queued Calls          | <input checked="" type="checkbox"/>                                  |
| Statistics Refresh Frequency Range (seconds) | <input type="text" value="120"/> to <input type="text" value="900"/> |
| Call Center Batch Limit                      | <input type="text" value="2"/>                                       |

## Security

These settings can be ticked and unticked according to the System Provider’s preference. However, if all boxes are ticked it could lead to users accidentally creating errors and issues within Unity.

| Security                        |                                     |
|---------------------------------|-------------------------------------|
| Users Can Change Settings Tab   | <input checked="" type="checkbox"/> |
| Users Can Change Call Center    | <input checked="" type="checkbox"/> |
| Users Can Change Network        | <input checked="" type="checkbox"/> |
| Users Can Change Authentication | <input checked="" type="checkbox"/> |
| Users Can Change Their Password | <input type="checkbox"/>            |

## Privacy

If the “Call Details Available” box is not ticked, then the user will not be able to see the call details of other users. E.g. They will be able to see if someone is on a call but not who they are on a call to.

Enterprise View allows Groups to see the other Groups under the same Enterprise.

## Instant Messaging

These settings relate to Unity’s Instant Messaging capability. Please refer to the separate XMPP document for more information.

## User Monitoring

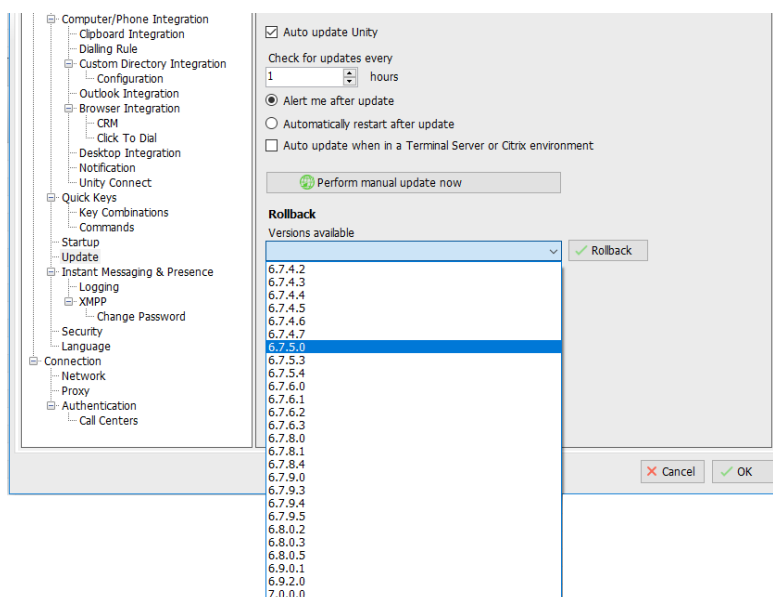

Select from the drop down menu how you want the default users in the Monitored User List to be presented:

- **None:** No users will be automatically populated until the user manages the user list in the BLF.
- **HideTab:** The Contacts tab will not be displayed at all.
- **Random:** The user list will automatically be populated with users randomly.
- **Top:** The first X number of users will be populated automatically.

## Updates

The “Old Clients Can Update To New Client” box must be ticked in order for users to be using the new blue Unity Client rather than the old red Unity Client.

If “Rollback Available” is ticked then users are able to rollback to older versions of Unity. Below is how this setting looks when available to a user in Unity.

## Custom Help Files

Enter the URL for a user guide (PDF) that the user can access through Unity in Help>Contents.

### Custom Help Files

## 5. SERVER HOSTNAMES

The server address is the unique identifier in the Portal. In this tab the list of all the server hostnames are listed, even though the hostnames are different they all route back to the same BroadWorks server.

To add another hostname, simply click the button at the bottom of the list.

## 6. PORTAL USER ACCOUNTS

View, delete and add new Portal user accounts and configure all user details, permissions, and notification settings.

To add a user click the "Add User Account" button, as shown below.

Simply enter all of the user's details.

**Please note:** It is recommended that you use the user's email address as their username to avoid any confusion. It does not matter which password you create as the user will be sent an email to change it.

Please leave the "Can Purchase Licenses" box unticked (as this service is redundant) but keep all other boxes ticked.

**Permissions**

|                        |                                     |
|------------------------|-------------------------------------|
| Can Purchase Licenses  | <input type="checkbox"/>            |
| Can Create Objects     | <input checked="" type="checkbox"/> |
| Can Update Objects     | <input checked="" type="checkbox"/> |
| Can Delete Objects     | <input checked="" type="checkbox"/> |
| Can Reactivate Objects | <input checked="" type="checkbox"/> |

## 7. LICENSE DETAILS

View, allocate and assign all Unity licenses in the license details tab. Please note that trial licenses are automatically assigned once the user has started Unity for the first time and are automatically deleted once the trial duration has ended.

Details | Automatic Assignment | Branding | Server Hostnames | Portal User Accounts | License Details | Resellers | History Log | User Templates

### Licenses

| Purchases                        | Allocations | Assignments | UnityCrmIntegration Trial              | 0         | 0         | 1        |
| Purchases                        | Allocations | Assignments | UnityDashboard Standard                | 35        | 0         | 35       |
| Purchases                        | Allocations | Assignments | UnityDashboard Trial                   | 0         | 0         | 12       |
| Purchases                        | Allocations | Assignments | UnityDesktop Enterprise                | 135       | 0         | 92       |
| Purchases                        | Allocations | Assignments | UnityDesktop Lite                      | 4105      | 0         | 3715     |

In the Purchased column you will see all licenses purchased for that application, similarly in the assigned column you will see how many licenses have been assigned to users for that license type.

| Purchased | Allocated | Assigned |
|-----------|-----------|----------|
| 1400      | 0         | 1355     |
| 135       | 0         | 92       |
| 4105      | 0         | 3715     |
| 4700      | 0         | 4519     |

Click on assignments to view all users that have that license assigned.

### UnityAgent Enterprise Assignment Details

UnityAgent Enterprise licenses currently assigned to the users of this group. Temporary licenses cannot be explicitly assigned to users. They are automatically assigned.

Include Expired Licenses

| User                              | Start Date |
|-----------------------------------|------------|
| <a href="#">View</a> Iain Sinnott | 2014.01.27 |
| <a href="#">View</a> JC Bhat      | 2015.11.05 |
| <a href="#">View</a> Jenna        | 2016.07.13 |
| <a href="#">View</a> John Cole    | 2016.04.14 |

All licenses assigned to that user will then be listed along with the start date, end date and which version they are using.

### Jenna License Usage

All licenses assigned to this user. A user can have only one permanent license per application. When adding a new permanent license, all existing permanent licenses for the same application will be deleted.

| <input type="checkbox"/> Include Inactive | License                               | Start Date | EndDate        |
|---|---------------------------------------|------------|----------------|
| <input type="button" value="View"/>       | UnityAgent Enterprise                 | 2016.07.13 | Active License |
| <input type="button" value="View"/>       | UnityContactCenterAgent Standard      | 2016.08.09 | Active License |
| <input type="button" value="View"/>       | UnityContactCenterSupervisor Standard | 2016.10.24 | Active License |
| <input type="button" value="View"/>       | UnityCrmIntegration Standard          | 2016.12.01 | Active License |
| <input type="button" value="View"/>       | UnityDashboard Standard               | 2016.11.14 | Active License |

Here you can manually add a license assignment by clicking the add assignment button and selecting the license type from the drop down menu.

|   |                            |
|---|----------------------------|
| <input type="button" value="View"/>           | UnityReception Enterprise  |
| <input type="button" value="View"/>           | UnitySupervisor Enterprise |
| <input type="button" value="Add Assignment"/> |                            |

Please note that only the licenses that the user doesn't have will be present. Simply select which license you want to add then click Add Assignment.

## 11. USER TEMPLATES

Templates are usually assigned to users at the Group level but they can also be assigned at the Reseller and System Provider level. However, this will then be cascaded down the hierarchy to all the users under the Resellers. Therefore, we recommend that you assign Templates at the Group or User level.

|  |                      |          |                  |                      |                 |           |            |
|--|----------------------|----------|------------------|----------------------|-----------------|-----------|------------|

| <a href="#">View</a>   | UnityReception       |          |                  |                      |                 |           |            |

## 12. KNOWLEDGE BASE

The knowledge base provides a variety of articles relating to all Unity products. Articles include solutions to issue reports, technical documents and white papers.

### Unity Application Suite Knowledge Base

Search online for articles relating to all products in the Unity application suite. Click the title to view the article in full.

|             |                  |
|-------------|------------------|
| Application | All Applications |
| Version     | All Versions     |
| Category    | All Categories   |
| Keywords    |                  |

Simply select the application, version and category from the drop down menu then click Search. You can also add in any keywords for more filtered results.

## 13. NOTIFICATIONS

---

Unity License Consumption reminders are listed on the Notification page along with the latest news, releases and feature requests from Unity. When you first log into the Portal, you will be taken to the Notifications page.

### Notifications

**New Unity Release Available**

Hello,

Version 6.7.6.1 of Unity is now available as a general release, meaning end-users will automatically update to this version if configured to do so through the Unity portal.

New installers are available on request, please send an email to <mailto://ineedhelp@kakaposystems.com> if you would like preconfigured installers created. Please ensure you include the FQDN of the VoIP server that Unity should connect to, as well as the default domain if a single domain is used by all users.

The release notes are available from <http://www.kakaposystems.com/wp-content/uploads/2013/10/Unity-Application-Suite-Latest-Release-Notes-21-december.pdf> - all users guides have been updated with new functionality.

Thanks,  
Kakapo Systems

The Notifications will remain on the page until they are removed. To delete a Notification, simply click Remove.

## 14. INVOICES

---

At the System Provider, Reseller and Group level, the invoices page lists all unpaid invoices along with the invoice number, date and value.

You can also view paid invoices by ticking the box and clicking View PDF.

### Invoices

| <input type="checkbox"/> Include Paid Invoices | Invoice Number | Invoice Date |
|--|----------------|--------------|
| <input type="checkbox"/> View PDF              | P-3571         | 2017.01.20   |
| <input type="checkbox"/> View PDF              | P-3569         | 2017.01.17   |
| <input type="checkbox"/> View PDF              | P-3566         | 2017.01.13   |
| <input type="checkbox"/> View PDF              | P-3560         | 2017.01.05   |
| <input type="checkbox"/> View PDF              | P-3559         | 2017.01.04   |

## 15. TROUBLE SHOOTING

---

If you get any of the below errors, there could be a simple explanation:

- A **license expired error** when the license has not expired could be because the wrong server host address has been entered. Please check the server host name and restart Unity.
- If the user gets a **license expired error** and the server hostname is correct then you need to check which Unity application the user is running as they may have changed the Start-up application. E.g. A user had a Reception license but accidentally changes their Start-up application to Desktop, a Desktop trial license will automatically start.

At the end of the trial duration the user will be presented with the license expired error - they would need go into Unity settings and change their start up application back to Reception.

- If **Groups can't see the other Groups** under the same Enterprise, then the "Enterprise View Available" box in the System Provider's Branding tab has not been ticked. Tick the box, click Update then restart Unity.
